SCIENCE: Living things and their habitats

## Grouping Living Things

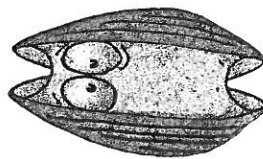

A living thing is called an organism. All plants and animals are organisms. Living things can be split into plants and animals, but they can also be split into smaller groups.

Look at the organisms and find what they have in common.

Circle each organism below that has a **shell**.

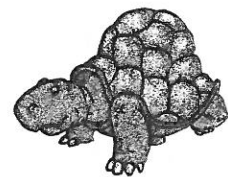

Snail

Mussel

Man

Tortoise

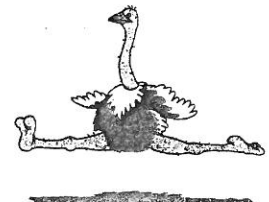

Blackbird

Crab

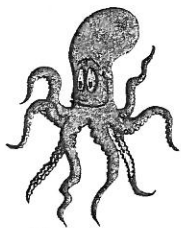

Monkey

Ostrich

All the organisms above that **aren't** circled have something in common. Fill in this sentence to say what it is.

They all have two .....

Octopus

Butterfly

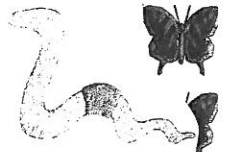

Mole

Bird

Spider

Worm

In the boxes below, **draw** the animals which fit in each box.

They have wings:

They have 8 legs:

They live in the soil:
