

We have been exploring colour mixing with paint this term.

Use the primary colours to make the colours you find in nature.

Use fingers/ cotton buds/ paintbrushes to mix the paints.

Go for a walk in your local environment or visit a local park. During the walk, talk about how the environment has changed throughout the year and point out how the trees have changed and look at the flowers that are blooming.

Grow a sunflower.  
Talk; about what the flower will need to grow.

Send in a photo of the sunflower in bloom.

## Sunshine and sunflowers

We are looking at matching numerals to quantity

Can you put the correct spots on a ladybird?

Number some plant pots and put in the right number of seeds/pompons

This seasonal project provides opportunities for outdoor learning and teaches children how to care for the plants and animals in their local environment and how to stay safe in the sun.

Make a home for a mini beast.

Can you name all the mini beast you find?

Paint or draw your favourite one.

Share your favourite book about a mini beast.

Talk about what happened in the story.

Make a butterfly.

Can you design and make a butterfly?

We have been talking about the wings being symmetrical.

We are still practicing writing our names this week.

Write your name or copy over your name to practice.

Make some play dough and join in with the dough gym activities.
