

## East Bridgford, St. Peter's C of E Academy – Homework

**Teacher: Mrs Archer Dytch**

**Subject Science**

**Date: 5.3.26**

Good afternoon,

It was lovely to see so many of you at parents evening over the last few days. All the children have made so much progress and it was fantastic that they had the opportunity to share their work with you. I know how proud they all are of their achievements and it was a delight to hear how proud you are too.

We have had so much fun today during World Book Day. It was wonderful to see all the different characters in class today. We have spent the morning doing World Book Day activities and we watched the live programme with thousands of other schools. We are also very excited for tomorrow as we are showing our volcano work to the rest of Lower Key Stage 2, before spending the afternoon watching those that can, erupt. **Friday: THE VOLCANOES WERE FABULOUS!!!**

**6th-15th March SCIENCE WEEK!** The theme is Curiosity: What's Your Question. Our focus for the week will revolve around each class asking a question and putting together an investigation to answer it. Maple class will be asking the question 'How do birds build their nests? We will have lots of practical fun, building nests and testing their strength using a strong fan.

**PE:** We will continue to have outdoor PE on Tuesday and Thursday. Please send appropriate kit for all weathers.

### **Curriculum:**

In English we are continuing with our Hot Write and in Maths we are just about to start Fractions. In geography we looked at the cause and effect of an earthquake and in science we sorted rocks into metamorphic, sedimentary and igneous categories.

### **HOMEWORK:**

As our focus is science for the week, I would like the children to research a scientist which they will be able to talk to the class about; explaining why they choose their scientist, what achievements they have made and what characteristics they think the scientist has. They can choose either well-known or, less known scientists if they wish, therefore sharing the multitude of roles scientists have.

Thank you.

**Mrs. Archer Dytch**
